Dear Public Service Commission,

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians.

With the level of profit that Duke Energy has, they should be able to invest in renewable energy without raising consumer's prices. Their request is greedy and irresponsible.

Sincerely,

Kent Cline

If Germany can do it, so can Duke.
